Professional Experience

Freelance UI/UX Designer

Self-employed | July 2024 – Present

Domain Registry Website Redesign

- Led a redesign of a 20-page corporate website with a focus on optimising user journeys by simplifying and restructuring the information architecture.
- Optimized user flows to support efficient access to key content for 3 distinct user groups: corporate lawyers, domain registrars, and the general public.
- Delivered wireframes and production-ready UI designs, iterated through stakeholder feedback to improve usability and clarity.
- Balanced visual and structural improvements with familiar patterns to support long-time users of the 15-year-old site.

Charity Website Redesign

- Led the redesign of a 10-page website to strengthen brand perception and attract new business partners and donors to boost charity’s impact.
- Produced wireframes, mock-ups, and interactive prototypes for both desktop and mobile with a strong and emotionally resonant visual identity.
- Tested prototypes with 10 users, uncovering navigation and content clarity issues, which informed key design refinements.
- Kept an open feedback loop with stakeholders and worked closely with developers to ensure smooth and accurate implementation.
- Focused design decisions on increasing trust, clarity, and donor engagement, ensuring alignment with the charity’s values and goals.
- Delivered developer-ready files with reusable components and design variables to enable efficient build and future scalability.

Architectural Designer @ KPMB Architects

Toronto, Canada | May 2022 – July 2024

- Gathered user insights on spatial needs and frustrations, translating them into design priorities for the team to address in the new building design.
- Researched backstage user behavior and spatial flow in theatre design, applying user journey mapping and behavioral analysis to inform functional plan layouts.
- Participated on the firm’s Design Values Committee to create a shared design process; gathered feedback and iterated guidelines adopted across teams for lasting impact.
- Presented firm-wide to share my experience with advanced tools and collaborative design strategies to solve complex architectural challenges, enabling other teams to solve similar challenges effectively.

Skills & Tools

UX Skills

User Research · Design Thinking ·
Heuristic Evaluation · Wireframing ·
Prototyping · Usability Testing ·
Information Architecture

UI Skills

Visual Design · Interaction Design ·
Mobile & Responsive Design · High/Low-
Fidelity Mockups

Tools
